

Interested in joining the DOGA Mentoring Program?

This is going to be the fourth batch of our Mentoring Program. Let's hear what our previous mentors and mentees have to say about the program:

... Very helpful mentor who has been giving (me) a lot of advice throughout leading her to join (my desired) field

... A perfect match!

...Helpful even just with e-mailing

... Very useful program and caring mentor

... A great resource for old girls in general

DOGA proudly announces the launch of our next batch of **Mentoring Program** focusing on members who are currently in the final or second last year of their undergraduate studies or those who have graduated for less than 2 years from college. This is a **twelve month program** for the mentor and mentee to form into a mutually agreed learning partnership based on the career interests of the mentees, which could be face to face meetings, phone conversations or just email correspondence. We also welcome those who have participated in the past and wish to join the program again to enroll.

Mentoring is a developmental partnership through which one person shares knowledge, skills, information and perspective to foster the personal and professional growth of someone else.

Benefits of Mentoring:

- Learn new skills and competencies in a safe environment.
- Choose your pace. Expand your skills according to your schedule.
- Expand your knowledge base. Your mentor will not only provide support in your career development area but you would also have an opportunity to learn tips and best known methods.
- Increase your network of contacts within the DOGA family.

Next Step:

If you are interested, please choose the appropriate form, fill in the details and send it to Carmen Law by **Mar 27, 2009** at the following email address:

Carmen.law@intel.com

Your personal information will be kept in utmost confidentiality. Once we have obtained your enrolment/interest, we will try and pair up mentor/mentee based on mentor's work experience and areas of professional expertise and mentees' desired career development area(s). We target to inform you of the results by end April.
